## **DETAILED ACTION**

## Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 36-45 and 71, drawn to a system for controlling a fuel governor for injection internal combustion engine by speed sensor, classified in class 701, subclass 103.
  - II. Claims 11-19, 46-54, drawn to a system for controlling a fuel governor for injection internal combustion engine by the gear ratio, classified in class 123, subclass 319.
  - III. Claims 20-27, 55-62, drawn to a system for controlling a fuel governor for injection internal combustion engine by mass/weight of the vehicle, classified in class 123, subclass 339.16.
  - IV. Claims 28-35 and 63-70, drawn to a system for controlling a fuel governor for injection internal combustion engine by road condition, classified in class 701, subclass 117.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II, III, IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the

U

Art Unit: 3747

inventions are unrelated because they have different modes of operation and different functions.

A system for controlling a fuel governor by the speed sensor has a separated utility such as to control the EGR or for controlling the emission at the exhaust.

- 3. Inventions II and I, III, IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are unrelated because they have different modes of operation and different functions. A system for controlling a fuel governor by the gear ratio has a separated utility such as to control the spark timing while it is idling at the start-up stage.
- 4. Inventions III and I, II, IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are unrelated because they have different modes of operation and different functions. A system for controlling a fuel governor by the weight of the vehicle has a separated utility such as to improve the fuel economy.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

6. Applicant is advised that the response to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a diligently-filed petition under 37

CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Contact Information

Any inquiry concerning this communication should be directed to Examiner Kwon at

telephone number (703) 308-1046 and facsimile numbers (703) 308-7766. The examiner can

normally be reached on Monday thru Friday from 8:30 AM to 5:00 PM.

Art Unit: 3747

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0861.
